

Why use a cordless headset?

Free your hands. The most obvious benefit of a headset is that it frees you from holding the telephone handset. And lets you put both hands to work, comfortably.

Get more done. A headset makes you more productive, letting you type, page through files, etc. with both hands while you're on the phone.

Save your neck. You'll be more comfortable with a headset—no more propping the telephone between your head and shoulder.

Increase your reach. A cordless headset gives you all these advantages, plus the ability to get up and go—up to 150 feet away from your desk!

Why choose the GN 7170?

If mobility and productivity are what you're looking for, take a look at the GN 7170:

Cordless headset phone. With the GN 7170, you can take calls, and make calls, while you're away from your desk.

Convertible style. The GN 7170 lets you choose the wearing style that's right for you—either over-head or on-ear.

Sound in one ear (monaural). Ideal if you like to be aware of what's going on around you during phone calls.

Noise-filtering microphone. The right choice if you work in an environment where there's occasional noise.

GN 7170

Freedom, to go.

What do you get when you combine the hands-free convenience of a headset with the mobility of a cordless phone? The GN 7170, the cordless headset phone that frees more than your hands—giving you the freedom to take calls, and make them, as far as 150 feet from your desk. Pairing a single-line, analog phone with a sleek, high-quality headset, the GN 7170 multiplies your productivity potential.

Activewear for the office professional.

Like a cell phone for your office, the GN 7170 keeps you connected without tying you down. The headset is small and slender, and weighs next to nothing. So it's easy to wear, even for hours. It features a choice of wearing styles—a headband and an earwrap—so you can pick the style that suits you best. And its

noise-filtering microphone screens out unwanted room noise, so all they hear is you.

The 900 MHz cordless phone is nice and small, too—only a little bigger than your average cell phone. But it's got all the features you want: 10-number speed dial, redial, mute and more. It even supports caller ID (with a 40-number memory) and call waiting. Fully charged, the GN 7170 gives you a full 7 hours of talk time. And it's got a smart design, too. When you need to make a call, the belt clip flips up for easy access to the keypad.

All you need. All in one.

The GN 7170 system has everything you need to get going. In addition to the headset and phone, the package also includes a base station that doubles as a charger. You just hook it up, charge it up, and put it on. And you're free to go.
